

General Information

The nurseries and growers listed here supply native trees, shrubs and other plants appropriate for use in revegetation of farms, roadsides and other land in the different regions of rural Victoria.

The list has been prepared based on information provided by the nurseries and growers themselves and Greening Australia Victoria (GAV) cannot accept responsibility for the conduct of any nursery or grower listed.

GAV encourages and recommends, wherever possible, the use of indigenous plants grown from seed or cuttings collected locally.

We recognise that, in certain circumstances, site conditions may be extensively modified or indigenous species may not meet the objectives of the revegetation. Consequently, the list also includes nurseries which provide specialist non-indigenous stock. Please refer to the "Nursery Codes" key for guidance on individual nurseries and stock grown.

When purchasing plants, ask the grower for details on seed source and species suitability for your site.

GAV encourages the responsible collection of seed from remnant native plants found in your local area. The local nurseries and growers listed, whether indigenous or not, will generally be willing to propagate from seed that you supply. Permits are required to collect native seed from public land.

Plant stock provided by the listed nurseries and growers is generally either 15 cm tubestock, cell tray-plug systems (eg. Hiko, Lannen) or open-rooted seedlings.

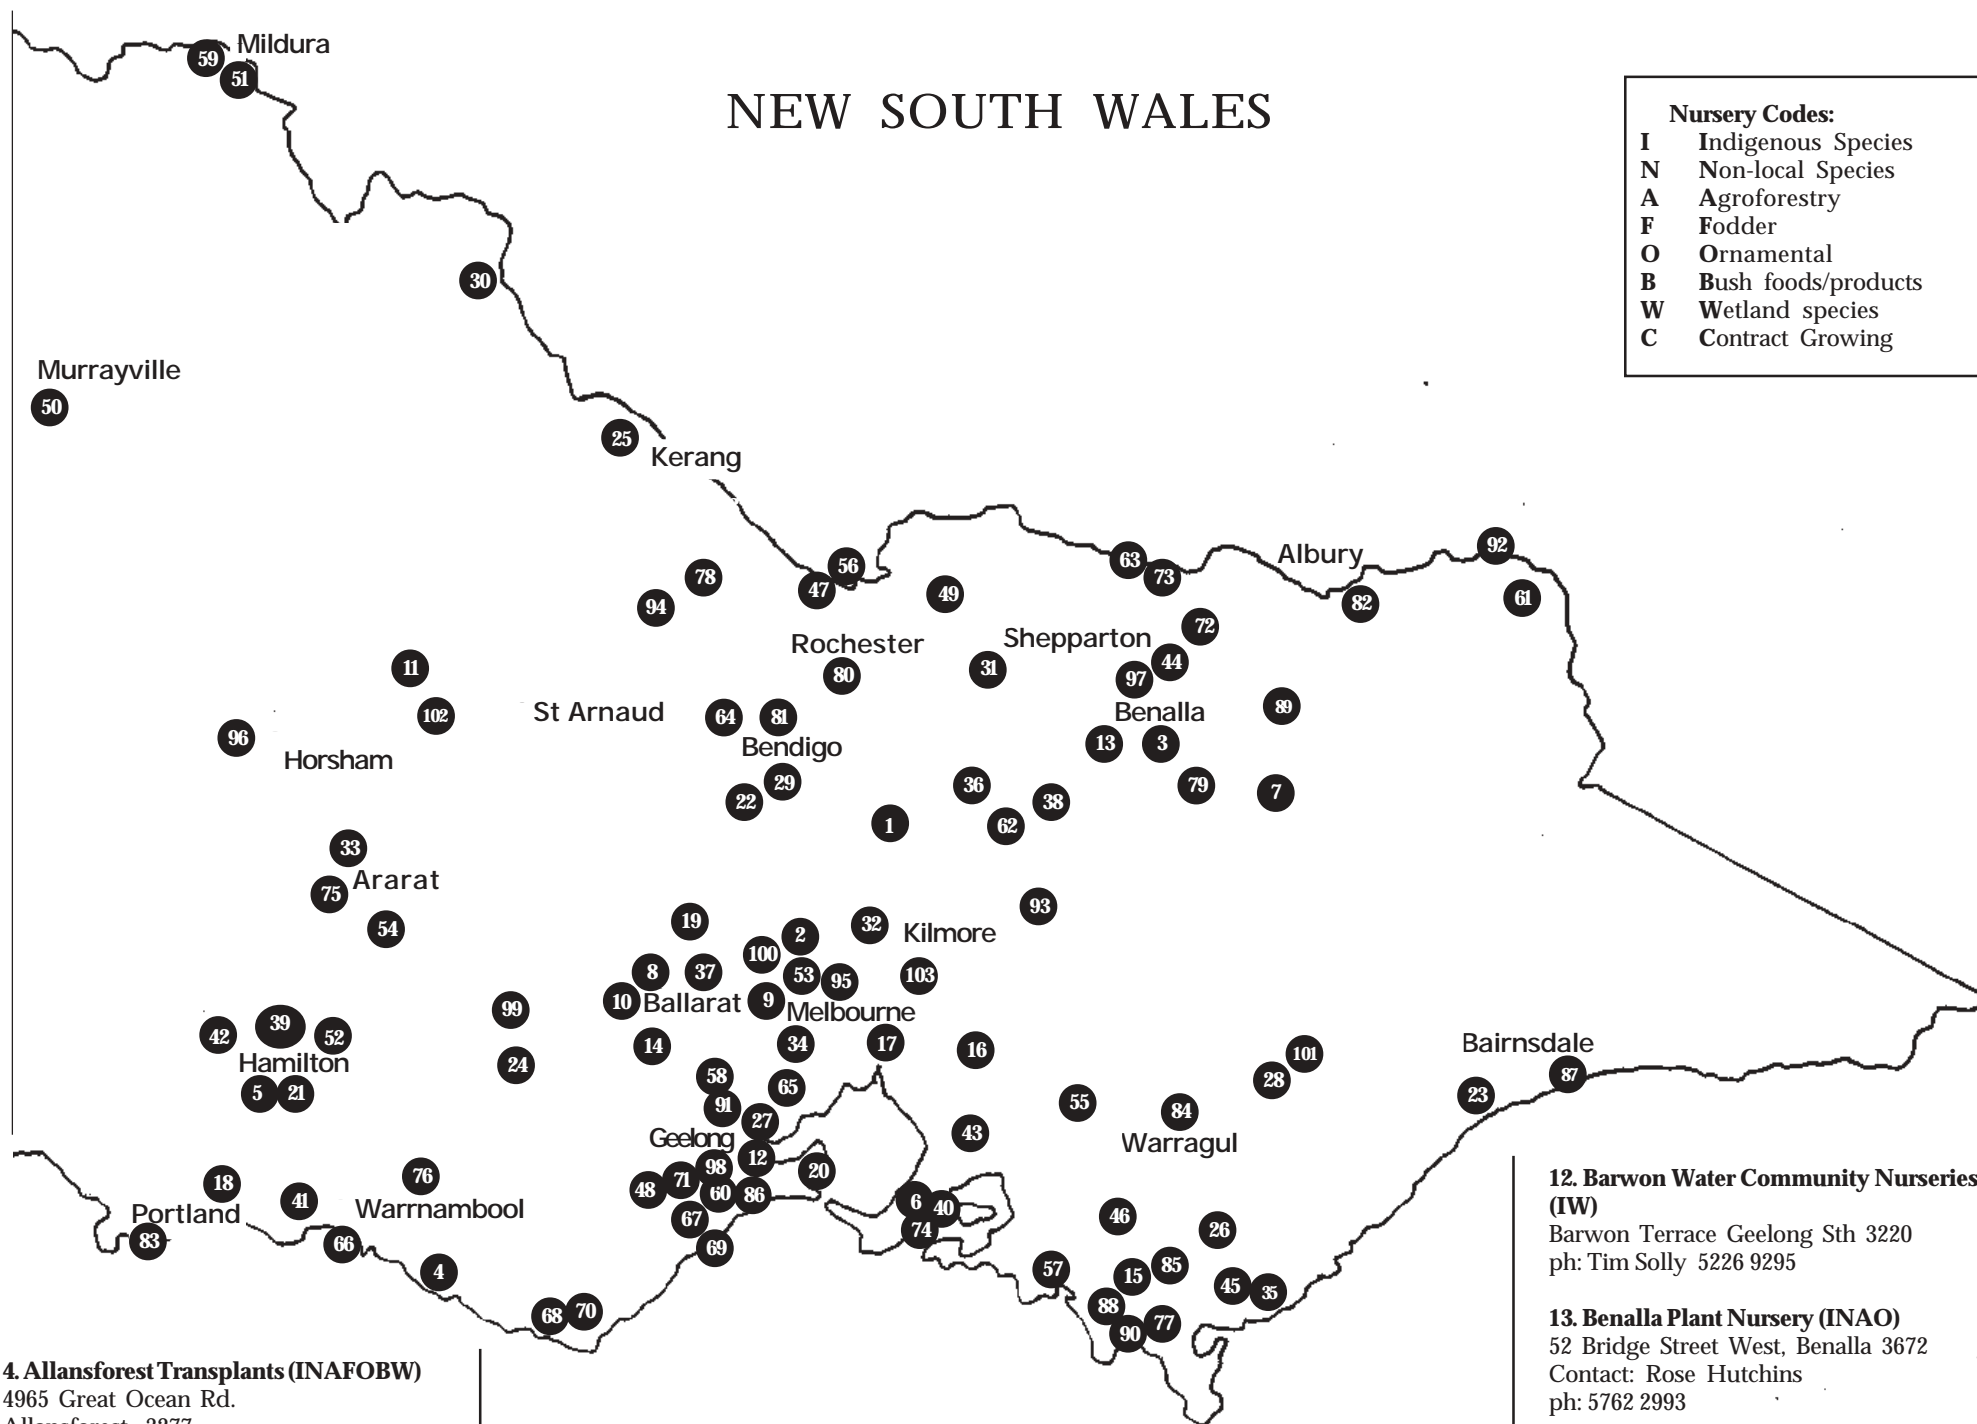

If you require further assistance with plant selection, contact GAV or the Department of Natural Resources and Environment. GAV also has lists of seedbanks and seed collectors in Victoria and of all indigenous nurseries in greater Melbourne.
